Internal Assessment Test Committee

The following committee is constituted to conduct internal assessment test and to solve if any related grievances arises in the academic year 2022-23.

Sl No	Name	Department	Position in the Committee
1	Guruprasad N	Geography	Convener
2	Basavaraju M	Kannada	Member
3	Prabhuswamy H K	Geography	Member
4	Manikanta C M	Commerce	Member
5	Jeevitha G S	Commerce	Member
6	Sowmya K	Commerce	Member
7	Parameshwarappa N P	SDA	Member

P Mahadevamma
PRINCIPAL

JSS College of Arts and Commerce
GUNDLUPET-571111

Decisions taken in the meeting

1. In the academic year of 2023-24, C1 test of 1st, 3rd & 5th Semester has been informed to be conducted by respective departments on their convenient days.
2. C2 test of 1st, 3rd & 5th semester has decided to conduct on 28, 29, 30 of December in the college.
3. Subject wise question papers of C2 test has decided to prepare within 23.12.2022 from the each departments & xerox copies of as many question papers as required should be prepared & submit to examination committee.
4. It was decided that the teaching faculty should perform the C2 examinations duties which assigned to them without taking leave.

Convenor

JSS College of Arts & Commerce, Gundlupet

Internal Assessment Tgt Committee.

06.06.2023

Decisions taken in the meeting

1. In the academic year of 2022-23, C1 test of 2nd, 4th & 6th Semester has been informed to be conducted by respective departments on their convenient days.
2. C2 test of 2nd, 3rd & 6th Semester has decided to conduct on 04th, 05th, 06th of July in the college.
3. Subjectwise question paper of C2 test has decided to prepare within 30.06.2023 from the each departments & xerox copies of as many question papers as required should be prepared & submit to examination committee.
4. It was decided that the teaching faculty should perform the C2 examination duties which assigned to them without taking leave.

DEPARTMENT OF ENGLISH

Internal Assessment Test – Even Semester 2022-23

II SS B.Com

Subject – Language English

**Time: 1 Hour
Max. Marks =20**

Answer any two of the following.

10 x 2= 20

1. Ulysses by the Merlion reflects ideas of nation building and a multi-cultural society. Substantiate.
2. “Individual Liberty leads to social anarchy.” Comment.
3. Sketch the character of the unnamed individual who represents citizens in a surveillance state.

JSS COLLEGE OF ARTS AND COMMERCE GUNDLUPET-571 111

DEPARTMENT OF ENGLISH

Internal Assessment Test – Even Semester 2022-23

II SS B.Com

Subject – Language English

**Time: 1 Hour
Max. Marks =20**

Answer any two of the following.

10 x 2= 20

1. Ulysses by the Merlion reflects ideas of nation building and a multi-cultural society. Substantiate.
2. “Individual Liberty leads to social anarchy.” Comment.
3. Sketch the character of the unnamed individual who represents citizens in a surveillance state.

Environment Studies
Test - C1

Fathima Shoukrya
T.P. 10m
001092010054
EVS [C1]
14/6/23

- 1) Explain the importance of biodiversity?
- 2) What is the Meaning of Environment? Scope & Importance of Environment studies?
- 3) Explain the conservation of bio diversity?

1) Biodiversity is defined as variety and variability of living organisms from all sources including plants, animals, micro organisms etc.

Importance of Bio diversity

- * Biodiversity is important which provides natural valuable resources
- * Helps to maintain stability of ecosystem
- * Biodiversity provides food
- * It function as a carbon fixation unit
- * Biodiversity involves carbon cycle, oxygen cycle etc.

Bio diversity categorized

- 1) Genetic ~~to~~ diversity
- 2) Species ~~to~~ diversity
- 3) Ecosystem ~~to~~ diversity

1) Genetic Diversity :-

Diversity or variability of genes that exist among individuals of the same species and among the species genes are to the basic source of biodiversity.

2) Species Diversity :-

Variability of that exist among different species of ecosystem

Ex:- *felis tigris* - Tiger
felis domestica - Cat

The above two organisms are the different species of the same family but they are different from one another this shows the species diversity

3) Ecosystem Diversity :-

Variation or variety that exist between two different ecosystem in the same geographical area is called Ecosystem Diversity

In a forest there will be existence of lake pond & forest & grassland ecosystem in a single geographical area there are different types ecosystem that exist. This shows Ecosystem diversity.

2)

Definition

The term Environment has been derived from a French word ENVIRON means "to surround" Environment is a study of earth and the sum of factors conditions that surrounds us at a given point of time and space

Scope and Importance of Environmental Studies

Scope of Environment studies

- * It deals with quality of Environment such as quality of air, water, soil
- Environmental studies deals with the natural resources, their exploitation & conservation
- * It also includes study of Management of sewage, industrial effluent and recycling of ~~bio-diversity~~ bio-degradable waste
- Environment studies deals with soil waste management which is a serious issue
- * Environment studies deals with the study of bio-diversity and its conservation
- An environmental study is helpful to solve environmental problems.

Importance of Environmental studies

- 1) Environmental studies create awareness among people to know about the various resources and their conservation and proper utilization
- 2) It helps to understand natural disasters like Earthquake, tsunami, volcanic eruption etc & also helps to prepare to fight disasters
- 3) population explosion is serious problem to solve the which we need have knowledge of environmental studies
- 4) It helps to understand and mitigate environmental pollution and degradation such as water pollution, air pollution, and land degradation
- 5) It helps to understand natural mon including disasters
- 6) It helps to understand environment as per rules and regulation to protect the environment

2 Scope & Importance of Environmental studies

→ Scope :- (Scope of environmental studies are vast)

- i) It deals with quality of environment such as :
quality of air, water & soil
- ii) Environmental studies deals with the natural resources,
their exploitation and Conservation
- iii) It also includes the study of management of
sewage, industrial effluent and recycling of
bio-degradable waste.
- iv) Environmental studies deals with solid waste
management which is a serious issue.
- v) Environmental studies deals with the study of
bio-diversity & its conservation.
- vi) An environmental studies is helpful to solve
environmental problems.

→ Importance: The Importance of the environment cannot be neglected & denied:

- 1) Environmental studies create awareness among people to know about various resources and their conservation and proper utilization.
- 2) It helps to understand natural disasters like Earthquake, Tsunami, volcanic eruption etc. and also helps to prepare to fight disasters.
- 3) Population explosion is serious problem to solve this we need more knowledge of environmental studies
- 4) It helps understand and mitigate environmental pollution and air pollution and land degradation etc.
- 5) It helps to understand Natural and man induced disaster
- 6) It helps to understand environmental acts, rules and regulations to protect the environment

3) Explain the conservation of bio diversity.

A: Conservation of bio-diversity is nothing but to save or protect the bio-diversity for future generation it is one of the essential part:

Importance of biodiversity:

- i) It is important to conserve plants & Animal species
- ii) To maintain genetic diversity.

- iii) To conserve ecosystem & community
- iv) To prevent exotic species
- v) To maintain variability of species.

There are two techniques of conservation of bio diversity :-

- a) In-Situ conservation
- b) Ex-Situ conservation.

a) In-Situ Conservation:-

In-Situ conservation of species is a best done by protecting its habitat along with all other sp. in its habitat or conservation of species in its natural habitat

- i) Bio-sphere reserve.
- ii) Natural Parks.
- iii) Wildlife Sanctuaries
- iv)

b) Ex-Situ Conservation:-

Conservation of natural habitat outside its natural habitat is known as Ex-situ conservation

U.S.S. College
 Hajarani, H.M
 2nd Term (2nd sem)
 Date: 17/06/2023
 Subject: EVS

② Environment meaning:-

Environment can be defined as a sum total of all the living elements and their effects that influence human etc. while all living or biotic elements are animals, plants, insects, fishes, and birds. non-living or abiotic elements include water, land, sunlight rocks and air.

The Scope of Environment:-

- ① conservation of natural resources.
- ② conservation of biological diversity.
- ③ control of environmental pollution.
- ④ stabilization of human population & Environment.
- ⑤ social issue in relation to development & Environment.
- ⑥ Development of non-polluting renewable energy system & providing a new dimension to nation's security.

Importance of Environment:-

- * we truly cannot understand the real worth of the environment.
- * It plays a vital role in keeping living things healthy in the environment.
- * It maintains the ecological balance that will keep check of life on Earth.
- * It provides food, shelter, air & fulfill all the human needs whether big or small.
- * It maintaining physical & mental health.
- * It helps in maintaining various life cycles on Earth.

the importance of Bio-Diversity

① Biodiversity:

It refers to the variety of living species on Earth, including plants, animals, bacteria, and fungi.

Importance of Bio-diversity

Bio-diversity & its maintenance are very important for ~~the~~ sustaining life on Earth. A few of the reasons explaining the importance of Bio-diversity.

- * Ecological stability
- * Economic ~~stab~~ importance
- * Ethical importance

* Ecological stability: - Every species has a specific role in an ecosystem. They capture & store ~~the~~ energy and also produce & decompose organic matter. The ecological stability depends on the services without which the humans cannot survive. A diverse ecosystem is more productive and can withstand environmental stress.

* Economic importance:-

Bio-diversity is a reservoir of resources for the manufacture of food, cosmetic products, and pharmaceuticals.

Crops, livestock, fishery, and forests are a well-known source of food. Wild plants such as cinchona and papaver plant are used for medicinal purposes. Wood, fibres, perfumes, lubricants, rubber, resins, poison & cork are all derived from different plant species.

The national parks & sanctuaries are a source of tourism. They are a source of beauty & joy for many people.

* Ethical Importance :-

All species have a right to exist. humans should not cause their voluntary extinction. Bio-diversity preserves different cultural and spiritual heritage. therefore, it is very important to conserve Bio-diversity.
